

# Superior one-piece pools

For indoor and outdoor use

[bakewellpools.co.uk](http://bakewellpools.co.uk)

Bakewell Pools

# About us

Bakewell Pools is a leading supplier of one-piece swimming pools. We are a family business and have specialised in the supply of fibreglass and ceramic swimming pools for over 25 years.

About 15 years ago Bakewell Pools moved from pool installing to supply only and since that time has delivered well over five hundred fibreglass pools to the UK, mainland Europe and Channel Islands for self and builder installation. This background gives us an excellent knowledge base to help our customers with their own installation. We regularly liaise with customer's builders, plumbers and electricians to offer advice or reassurance prior to and during the installation process. This is all part of the service we offer.

## Why fibreglass?

One-piece fibreglass swimming pools are now firmly established within the UK swimming pool industry and it's not difficult to see why.

Installation can be carried out by your builder and can be completed within a fraction of the time and cost of a concrete or liner pool and with much less disruption. The light, skimmer and inlets/outlets are all factory fitted during manufacture which saves you considerable time.

Our fibreglass pools are a one-piece reinforced construction with options for internal corner steps and benches, roman ends and chambers for automatic covers. Being one-piece you don't have to worry about the sharp edges you quite often get on a liner pool with a bolted-on roman end. Of course, you also have no joins or seams that can leak or encourage bacteria build up.

A new range of ceramic pools that incorporate a fibreglass shell along with layering of 3-dimensional gelcoat to provide a sparkling and luxurious finish are now available.

Current Building Regulations require indoor pools to be insulated. We offer a factory sprayed insulation service to help you conform to Part L of these regulations to save you having to do this on site.

Our fibreglass swimming pools can be installed indoors or outdoors. They generally sit in-ground, but can be situated above ground or part in-ground if adequate support is provided. This is often a requirement within a heavily sloped garden.

Fibreglass pools are perfect for long term everyday use. Gone are the worries about tearing or wrinkling the liner or mosaic tiles popping off. Our pools include a 10-year manufacturer's warranty although in reality these pools are for life.

## Things to consider

Where will you locate your pool? Have a thought for drainage, sun position and wind direction, underground pipes and cables, and overhanging trees and foliage. Your plant room need only be a garden DIY shed and the nearer to the pool the less pipework and trench digging will be required.

Most outdoor pools do not require planning permission unless you are within a conservation area so this should be checked during the early stages of planning your project.

What is your access like? One-piece pools arrive on an articulated lorry. You may need to arrange on-site lifting equipment for the pool to access its final destination.

If your pool is an indoor pool, you'll need to plan ahead to get the pool in place prior to completing walls and/or roof.

# How a pool works

To keep a clean and clear pool, the water must pass through a filtration process. Water is drawn from the low suction grills and the waterline skimmer by the circulating pump and taken into the plantroom to be filtered and cleaned. The water is pushed down through a bed of media filter trapping any debris. The water is then returned to the pool via the inlets positioned at the opposite end of the pool. The filtration equipment is included with each pool we provide.

During the circulation procedure, the water can pass through a heating appliance; this may be a boiler or heat pump controlled by a thermostat. It is also advisable to incorporate your disinfection equipment in the circulation loop. We recommend the use of a chemical feeder and a UV lamp to purify and sanitise before returning the water to the pool.

The circulation process can be controlled by a time switch in the plant room to reduce the amount of manual intervention required. Every week or so the filter will need cleaning via a process called backwashing. This discards the debris trapped in the filter media out to waste. Most of our pool models now use a new filtration media called OC-1 which reduces the amount of backwashing required by around 75%, thus saving on waste water.

## Customising your pool

As well as providing your swimming pool, Bakewell Pools can advise and supply on other equipment such as heating, disinfection, de-humidification and covers etc.

### Insulation

For indoor pools, insulation is now a compulsory Building Regulation requirement. Our pools can be spray insulated at the factory during manufacture to help comply with Part L of the current Building Regulations.

### Heating

For outdoor pools an air source heat pump is a popular and economic method of heating a pool. Indoor pools are generally used all year round therefore oil/gas boilers are a good heating method.

### Dehumidification and ventilation

Every indoor swimming pool will require some form of dehumidification and ventilation to control the condensation and evaporation from the warm pool water. This equipment can be quite costly so ensure you incorporate this during your early planning and budgeting process.

### Disinfection

Why not save yourself time and reduce the manual handling of chemicals and invest in an automatic chlorine feeder. UV systems are particularly popular as they dramatically reduce the amount of chemical disinfection required.

### SwimJet

The resistance of the water flowing towards you allows you to swim continuously without being limited to the length of the pool. A SwimJet can be fitted into any of our one-piece models; they don't need to be just for exercise, they can be for fun as well!

### Pool covers

An uncovered swimming pool will lose about 65% or more of its heat by evaporation.

If safety is a consideration, automatic and manual safety covers are available which lock down the cover for peace of mind.

We have a range of pools that incorporate a cover chamber which hides away an automatic slatted cover when not in use.

# Installation

Our pools are delivered on a low loader transporter and the driver can detach the trailer from the front cab to carry the pool a short distance to enable better access to the site.

During manufacture, steel reinforcing bars and perimeter buttressing are encased within the shell to ensure maximum strength. If the ground is not quite ready for the pool on delivery, then it can be set down in an appropriate holding place and lowered in at a later stage using your digging equipment. Steel lifting strops are fibre glassed into both sides of the pool to enable it to be carried and lowered into the ground.

Full installation instructions will be provided as well as telephone technical support if needed.

You may be looking to install the pool yourself, or to employ a builder or garden landscaper. Installing a fibreglass pool is straightforward and follows these basic steps:

## The dig

We'll provide you with the dig measurements specific to the pool size you have chosen

## Ground preparation

Lay a pea shingle base and level

## Pool

Lower the pool into the hole and check levels

## Pipework

Connect pipes to the factory fitted inlets/outlets and run back to the plant room

## The fill

Backfill the surrounding trench with pea shingle whilst filling the pool with water

## Finish

Lay a concrete ring beam around the top as a base for your coping/ flooring

## Plantroom

Pipe up your filtration equipment

## Reach for your costume!

## MdP Unique range

MdP Unique offers beautiful elegance.

Designed to offer maximum functionality, the Unique incorporates corner steps for easy access without impacting on the swimming area.

### Safety step

Large non-slip first step to facilitate entry in to the pool

### Relaxation bench

Bench for at least three people

### Flat bottom at 1.50m

Opportunity of walking around the whole pool

### Prices start from £12,358

For current prices please refer to our website

Model	Base	Length	Width	Depth
Unique 10	Level Base	10.00m	4.00m	1.50m
Unique 9	Level Base	9.00m	4.00m	1.50m
Unique 8	Level Base	8.00m	3.80m	1.50m
Unique 7	Level Base	7.10m	3.60m	1.50m
Unique 6	Level Base	6.10m	3.30m	1.50m
Unique 5	Level Base	5.10m	3.10m	1.50m
Unique 4	Level Base	4.50m	3.80m	1.50m

# MdP Kubyka range

MdP Kubyka is a modern design, featuring clean lines and sophisticated style.

Designed with maximum practicability in mind, featuring the sunbed as a relaxation area with the body semi-submerged.

## Safety step

A non-slip, first step to facilitate entry to the pool which can be used as a headrest for the sunbed

## Relaxation step and bench

Incorporating a relaxation sunbed as well as a bench still leaving the length of the pool free for continuous swimming

## Flat bottom at 1.50m

Possibility of walking around the whole pool

## Prices start from £14,311

For current prices please refer to our website

Model	Base	Length	Width	Depth
Kubyka 83	Level Base	8.30m	3.90m	1.50m
Kubyka 73	Level Base	7.30m	3.70m	1.50m
Kubyka 63	Level Base	6.30m	3.50m	1.50m

## MdP Relax range

A rectangle level or sloping based pool with internal bench steps creating a great social area.

### Social area

Large internal bench steps for the whole family to relax

### Harmonious steps

Practical, non-slip, designer steps

### Choice of depth

Level or sloping base models

### Prices start from £14,163

For current prices please refer to our website

Model	Base	Length	Width	Depth
Relax 950	Level Base	9.00m	4.00m	1.60m
Relax 800	Level Base	8.00m	3.50m	1.50m
Relax 700	Level Base	6.90m	3.30m	1.50m
Relax 1111	Sloping Base	10.05m	4.10m	1.05/1.90m
Relax 910	Sloping Base	9.00m	4.10m	1.10/1.85m
Relax 750	Sloping Base	7.50m	3.50m	1.05/1.70m

## MdP Deep range

The rectangular design and wide access steps of the MdP Deep pools offer the maximum swimming area.

### Wide steps

The non-slip steps along the whole width allow safe, easy access to the pool

### Sloping base

With an inclined base, it offers swimmers the choice of depth

### Prices start from £13,001

For current prices please refer to our website

Model	Base	Length	Width	Depth
Deep 975	Sloping Base	9.00m	4.00m	1.02/1.82m
Deep 775	Sloping Base	7.30m	3.50m	1.07/1.68m
Deep 875	Sloping Base	8.50m	3.80m	1.08/1.80m
Deep 755	Sloping Base	7.30m	3.50m	1.07/1.68m

## MdP Wide range

MdP Wide offers a classic design thanks to its vertical walls and smaller angles.

The full width bench steps provide a perfect place to relax.

### Wide steps

The non-slip steps across the complete width of the pool allow safe and easy access to the pool

### Bench

A second step of 60cm is ideal to use as a relaxation bench

### Flat bottom at 1.50m

Opportunity of walking around the whole pool

### Prices start from £13,510

For current prices please refer to our website

Model	Base	Length	Width	Depth
Wide 85	Level Base	8.50m	4.10m	1.50m
Wide 75	Level Base	7.50m	3.90m	1.50m
Wide 65	Level Base	6.50m	3.70m	1.50m

# MdP Cover range

A choice of level and sloping base pools incorporating an integral cover chamber for an automatic slatted cover.

## Perfect aesthetics

Designed to integrate a cover hidden within the pool's structure

## Convenience

Optional remote control for cover removal

## Choice of shape

Integrated chamber is offered on several model shapes

## Prices start from £15,996

For current prices please refer to our website

Model	Base	Length	Width	Depth
Cover Unique 9	Level Base	10.00m	4.00m	1.50m
Cover Unique 8	Level Base	9.00m	3.80m	1.50m
Cover Unique 7	Level Base	8.10m	3.60m	1.50m
Cover Relax 950	Level Base	9.90m	4.00m	1.60m
Cover Relax 800	Level Base	8.75m	3.50m	1.50m
Cover Relax 700	Level Base	7.65m	3.30m	1.50m

Cover Relax 750	Sloping Base	8.25m	3.50m	1.05/1.70m

Cover Wide

Cover Relax

Cover Unique

Cover Kubyka

Sizes include the integral chamber. The chamber measures approximately 1 metre so the swimming area is reduced by this amount.

The chamber is a wet pit and is designed to house an automatic floating slatted cover. The cover and chamber lid are not included within the pool price and can be quoted for separately. Prices start from around £13,000. Options for coloured slats and remote-control fobs are available.

Safety covers are not suitable for these models as they require a dry chamber. The safety cover can be used with all our other models and can be housed in either a dry pit or top mounted at the end of the pool.

## MdP Lane range

MdP Lane is the first one piece lap pool on the market. Its simple, minimalist, elegant design is perfect for continuous swimming whilst at the same time providing a comfortable relaxation area.

### Length

The considerable length of the pool is perfect for lap swimming

### Relaxation bench

The design of the bench together with the steps allows you to relax leaving the length of the pool free for continuous swimming

### Safety step

Larger, non-slip, first step to facilitate entry to the pool

### Flat bottom at 1.50m

Possibility of walking around the whole pool

### Prices start from £17,299

For current prices please refer to our website

Model	Base	Length	Width	Depth
Lane 14	Level Base	13.70m	2.10m	1.50m
Lane 12	Level Base	11.70m	2.10m	1.50m
Lane 10	Level Base	9.70m	2.10m	1.50m

## MdP Smart range

MdP Smart are practical models designed for the smaller space. Their rectangular shape provides maximum use of the swimming area and the multiple step combinations allow the pools to be adapted to the space available.

### Budget

A range of pools to suit the smaller space and budget

### Steps

Multiple options for non-slips steps

### Flat bottom or sloping

The range offers a choice of a level floor or inclined base

### Prices start from £10,879

For current prices please refer to our website
