

## Superior one-piece pools

For indoor and outdoor use

Bakewell Pools

## About us

Bakewell Pools is a leading supplier of one-piece swimming pools. We are a family business and have specialised in the supply of fibreglass and ceramic swimming pools for over 25 years.

Starting off as pool installers over 30 years ago, Bakewell Pools now offers a unique supply service. This background gives us an excellent knowledge base to help our customers with their own installation. Part of the service we offer is to liaise with your builder, plumber and electrician to offer advice and technical information prior to and during the installation process. Bakewell Pools is the appointed UK distributor for Mon de Pra pools, the market leader of polyester pools in Europe.

## Why fibreglass?

Monoblock fibreglass swimming pools are now firmly established within the UK swimming pool industry and it's not difficult to see why.

Installation can be carried out by your builder and can be completed within a fraction of the time and cost of a concrete or liner pool and with much less disruption. Our fibreglass swimming pools can be installed indoors or outdoors.

The light, skimmer and inlets/outlets are all factory fitted during manufacture which saves you considerable time. Our fibreglass pools are a one-piece reinforced construction with options for internal corner steps and benches, roman end and chambers for automatic covers.

Being one-piece you don't have to worry about the joins or seams you get with a step-ended liner pool. The beautifully smooth gel coat finish is a non-porous surface and resistant to algae growth.

Fibreglass is naturally insulating so will help to retain the heat in your garden pool. Current Building Regulations require indoor pools to be insulated and we offer a factory sprayed insulation service to help you conform to Part L of these regulations to save you having to do this on site.

Fibreglass pools are perfect for long term everyday use. Gone are the worries about tearing or wrinkling the liner or mosaic tiles popping off. Our pools include a 20-year manufacturer's warranty although in reality these pools are for life.

## Ceramic finish

As well as the traditional gel coat finish, we also offer a range of models that incorporate a ceramic finish. The layering of 3-dimensional ceramic resin provides a sparkling and luxurious finish to your pool.

## How a pool works

To keep a clean and clear pool, the water must pass through a filtration process. Water is drawn from the low suction grills and the waterline skimmer by the circulating pump and taken into the plantroom to be filtered and cleaned. The water is pushed down through a bed of media trapping any debris. The water is then returned to the pool via the inlets positioned at the opposite end of the pool. The filtration equipment is included with each pool we provide.

During the circulation procedure, the water can pass through a heating appliance such as a heat pump controlled by a thermostat. It is also advisable to incorporate your disinfection equipment in the circulation loop. We recommend the use of a chemical feeder and a UV lamp to purify and sanitise before returning the water to the pool.

The circulation process can be controlled by a time switch in the plant room to reduce the amount of manual intervention required. The filter will need cleaning via a process called backwashing. This discards the debris trapped in the filter media out to waste. Our filtration pack includes a media which reduces the amount of backwashing required thus saving on waste water.

## Customising your pool

As well as providing your swimming pool, Bakewell Pools can advise and supply all your other swimming pool related equipment.

**Heating:** air source heat pumps are the most popular and economic method of heating a pool. All year-round models are available.

**Disinfection:** save yourself time and reduce the manual handling of chemicals and invest in an automatic chlorine feeder. UV systems will dramatically reduce chemical usage.

**SwimJet:** the resistance of the water flowing towards you allows you to swim continuously without being limited to the length of the pool.

**Pool covers:** an uncovered swimming pool will lose about 65% or more of its heat by evaporation.

If safety is a consideration, automatic and manual safety covers are available which lock down the cover for peace of mind. We have a range of pools that incorporate a chamber that hides away an automatic slatted cover when not in use.

**Dehumidification and ventilation:** every indoor swimming pool will require air handling to control the condensation and evaporation from the warm pool water.

## Installation

Our pools are delivered on a low loader transporter and the driver can detach the trailer from the front cab to carry the pool a short distance to enable better access to the site.

During manufacture, steel reinforcing bars and perimeter buttressing are encased within the shell to ensure maximum strength. If the ground is not quite ready for the pool on delivery, then it can be set down in an appropriate holding place and lowered in at a later stage using your digging equipment. Lifting straps are gassed into both sides of the pool to enable it to be carried and lowered into the ground.

Full installation instructions will be provided as well as telephone technical support if needed. You may be looking to install the pool yourself, or to employ a builder or garden landscaper. Installing a fibreglass pool is straightforward and follows these basic steps:

**The equipment:** early discussions will have identified what equipment is recommended to complete your project.

**The dig:** we'll provide you with the dig measurements specific to the pool size you have chosen.

**Ground preparation:** lay a 6mm-10mm crushed stone base and level.

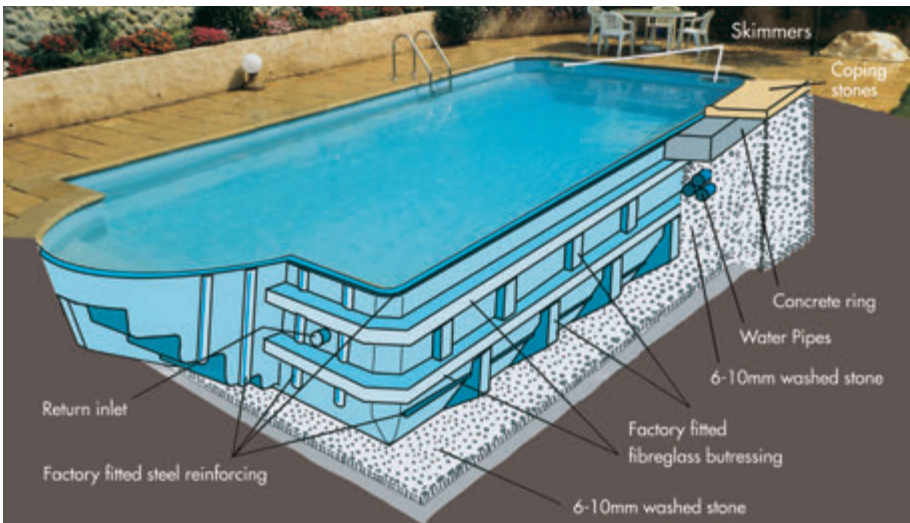

**Pool:** lower the pool into the hole and check levels.

**Pipework:** connect pipes to the factory fitted inlets/outlets and run back to the plant room.

**The fill:** backfill the surrounding trench with crushed stone whilst filling the pool with water.

**Finish:** lay a concrete ring beam around the top as a base for your coping/flooring.

**Plantroom:** pipe up your filtration equipment.

# MON<sup>de</sup>PRA

P I S C I N E S

Using an exclusive patented manufacturing system, eight layers are carefully manipulated including 3mm layer of gel coat, 1.5cm of fibreglass layering plus additional strengthening buttresses and 4cm diameter steel bars glassed into the structure.

## Monoblock

All models are manufactured with polyester Monoblock technology, without joints or splices, thus creating a structure that is totally resistant to movements and alterations of the terrain.

## High quality

The manufacturer works with materials of the highest quality. The best polyester resins on the market (used in the aerospace, nautical and wind sectors) reinforced with fibreglass guarantee maximum resistance against chemical agents.

## Unique range

The Unique range offers elegance and simplicity with beautifully curved steps inspired by ocean waves. Designed to offer maximum functionality, the steps are positioned to one side so you can take full advantage of the spacious bathing area. A wide comfortable bench runs to the end providing an ideal relaxation and social area.

Model	Base	Length/Width/Depth
Unique 10	Level	10.00m/4.00m/1.50m
Unique 9	Level	9.00m/4.00m/1.50m
Unique 8	Level	8.00m/3.80m/1.50m
Unique 7	Level	7.10m/3.60m/1.50m
Unique 6	Level	6.10m/3.30m/1.50m
Unique 5	Level	5.10m/3.10m/1.50m
Unique 4	Level	4.50m/3.80m/1.50m

## Kubyka range

The Kubyka is a modern design, featuring clean lines and sophisticated style. Designed with maximum practicability in mind, featuring the sunbed as a relaxation area allowing the body to be semi-submerged.

Model	Base	Length/Width/Depth
Kubyka 83	Level	8.30m/3.90m/1.50m
Kubyka 73	Level	7.30m/3.70m/1.50m
Kubyka 63	Level	6.30m/3.50m/1.50m

## Bay range

The Bay is ideal for those wanting a leisurely swim or perhaps just a relaxation on the sunbed with a good book. A modern design, featuring convenient access steps.

Model	Base	Length/Width/Depth
Bay 87	Level	8.30m/3.90m/1.50m
Bay 77	Level	7.00m/3.60m/1.50m

## Wide range

The Wide is a classic design with full width access steps offering easy access as well as a great social space. The extra width provides a great swimming area.

Model	Base	Length/Width/Depth
Wide 85	Level	8.50m/4.10m/1.50m
Wide 75	Level	7.50m/3.90m/1.50m
Wide 65	Level	6.50m/3.70m/1.50m

# Smart range

The Smart pools are practical models designed for smaller spaces. Their rectangular shape provides maximum use of the swimming area and the multiple step combinations allow the pools to be adapted to the space available.

Smart Covi 1	Size
Length	5.88m
Width	2.53m
Depth	1.45m

Smart Joker 1	Size
Length	5.00m
Width	3.42m
Depth	1.43m

Smart Lane	Size
Length	4.75m
Width	2.10m
Depth	1.50m

## Clever range

The Clever range is small, practical and square in shape offering two model variations.

Clever	Size - 1	Size - 2
Length	3.00m	4.25m
Width	3.00m	3.00m
Depth	1.40m	1.40m

## Tweet range

The Tweet model is specifically designed for relaxing and chatting thanks to the large bench. The rectangular shape of this compact pool still provides ample bathing space.

Tweet 55	Size	Mini Tweet	Size
Length	5.50m	Length	4.10m
Width	3.00m	Width	2.43m
Depth	1.50m	Depth	1.50m

## Deep range

The rectangular design and wide access steps of the Deep pools offer the maximum swimming area.

Model	Base	Length/Width/Depth
Deep 975	Sloping	9.00m/4.00m/1.02-1.82m
Deep 775	Sloping	7.25m/3.46m/1.07-1.68m
Deep 875	Sloping	8.50m/3.80m/1.08-1.80m
Deep 755	Sloping	7.30m/3.50m/1.07-1.70m

# Elliptic range

The design of the Elliptic range uses natural round shapes bringing a visual elegance and softness to the space.

Model	Base	Length/Width/Depth
Elliptic 965	Level	9.60m/3.95m/1.50m
Elliptic 825	Level	8.00m/3.85m/1.50m
Elliptic 670	Sloping	6.40m/3.40m/1.25-1.65m

# Lane range

The Lane range offers the longest one piece lap pool on the market. Its simple, minimalist, elegant design is perfect for continuous swimming whilst at the same time providing a comfortable relaxation area.

Model	Base	Length/Width/Depth
Lane 14	Level	13.70m/2.10m/1.50m
Lane 12	Level	11.70m/2.10m/1.50m
Lane 10	Level	9.70m/2.10m/1.50m

# Relax range

A rectangle pool with a choice of a level or sloping base. The Relax model incorporates a curved end with internal steps creating an ideal social area.

Model	Base	Length/Width/Depth
Relax 950	Level	8.30m/3.90m/1.60m
Relax 800	Level	8.00m/3.50m/1.50m
Relax 700	Level	6.90m/3.30m/1.50m
Relax 1111	Sloping	10.05m/4.10m/1.05-1.90m
Relax 910	Sloping	9.00m/4.10m/1.01-1.85m
Relax 750	Sloping	7.50m/3.46m/1.05-1.70m

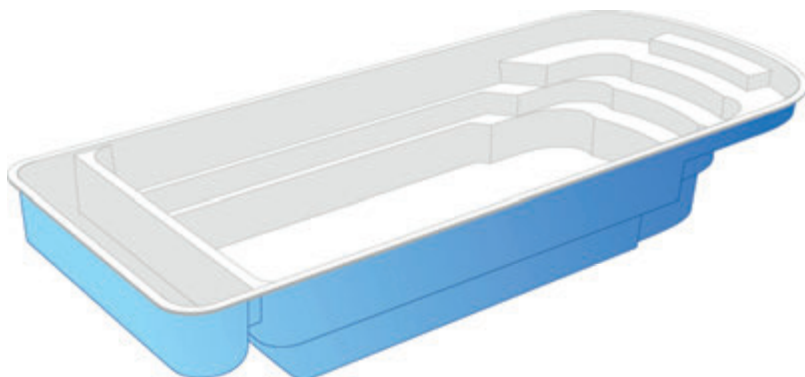

## Cover range

The Unique, Wide, Kubyka, Bay, Relax and Deep models are all available with an internal chamber to incorporate an automatic slatted cover.

The automatic slatted cover will be neatly hidden away within the chamber and will glide out across the water at a touch of a button. The covers are priced separately and start around £18,000.

The chamber will add on approximately 1.00m to the length dimensions.

Please refer to our website for the full range of Cover models and their dimensions.

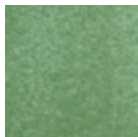

## Ceramic de luxe pools

A collection of ceramic pools offered in a range of elegant colours inspired by precious stones; full of nuances they will certainly capture your attention. The perfect combination between luxury and practicality.

The full ceramic range including shapes, sizes and prices can be viewed on the website.
